

Hi {Firstname},

A strong opening to the third-quarter earnings season sparked a late week, broad-based rally that helped stocks finish the week with solid gains.

The Dow Jones Industrial Average rose 1.58%, while the Standard & Poor's 500 added 1.82%. The Nasdaq Composite index led, gaining 2.18% for the week. The MSCI EAFE index, which tracks developed overseas stock markets, was up 1.37%.^{1,2,3}

Market Index	Close	Week	Y-T-D
DJIA	35,294.76	+1.58%	+15.32%
NASDAQ	14,897.34	+2.18%	+15.59%
MSCI-EAFE	2,300.97	+1.37%	+7.14%
S&P 500	4,471.37	+1.82%	+19.04%

Treasury	Close	Week	Y-T-D
10-Year Note	1.59%	-0.02%	+0.66%

Weekly performance for the Dow Jones Industrial Average, Standard & Poor's 500 Index, and NASDAQ Composite index is measured from the close of trading on Friday, October 8, to Friday, October 15, close. Weekly performance for the MSCI-EAFE is measured from Friday, October 8, open to Thursday, October 14, close. Weekly and year-to-date 10-year Treasury note yield are expressed in basis points.

Investor Optimism Returns

After beginning the week on a lackluster note, stocks turned higher on Wednesday as companies kicked off a new earnings season and details about the Fed's taper plans emerged. Investor enthusiasm shifted into high gear the following day on positive economic data and earnings reports that exceeded investor expectations. Buying continued through Friday on fresh earnings surprises and a better-than-expected retail sales report.

The economic data allayed some concerns about inflationary pressures and economic deceleration, while early earnings results provided hope that companies had weathered the surge in summer Covid infections. Nevertheless, worries about how supply-chain disruption and higher prices may impact corporate earnings guidance haven't gone away.

Let the Tapering Begin

Minutes from September's Federal Open Market Committee released last week provided detail around the Fed's plans to taper its \$120 billion monthly bond purchase program. The Fed expects to reduce its purchases by \$15 billion each month, beginning in mid-November/December and ending in June 2022.⁴

This tapering schedule is somewhat faster than what investors were anticipating, reflecting the Fed's concern that inflation has been somewhat higher and more persistent than it had anticipated, with continuing supply-chain bottlenecks raising that risk level. Fed Chair Powell's commitment to transparency and advanced signaling of policy changes appeared to have worked, as markets greeted the news calmly. In fact, stocks rallied strongly the following day as yields moved lower.

This Week: Key Economic Data

Monday: Industrial Production.

Tuesday: Housing Starts.

Thursday: Jobless Claims. Existing Home Sales. Index of Leading Economic Indicators.

Friday: PMI (Purchasing Managers' Index) Composite Flash.

Investing involves risks, and investment decisions should be based on your own goals, time horizon, and tolerance for risk. The return and principal value of investments will fluctuate as market conditions change. When sold, investments may be worth more or less than their original cost. Companies may reschedule when they report earnings without notice.

"It is not the years in your life but the life in your years that counts."

— Adlai Stevenson

How to Research Tax-Exempt Organizations

The IRS makes it easy to check various organizations' status to ensure that they are eligible to receive tax-deductible contributions. It provides a tool, Tax Exempt Organization Search, which allows users to research an organization quickly and easily, using information such as the organization's name, Employee Identification Number, and location.

In addition to finding out whether an organization is eligible to receive tax-deductible donations, users also automatically can see whether any organizations' tax-exempt status has been revoked (which happens if they don't file their required Form 990-series for three years in a row), as well as access IRS determination letters that recognize the organization as tax-exempt, among other information.

What Are Alkaline Foods, and How Can They Benefit You?

Eating healthy foods and exercising are two of the main components of a healthy lifestyle, but maintaining a healthy pH level is another one. All foods are classified as acidic or alkaline, and knowing which ones are which can help you lose weight, reduce inflammation, and have more energy. Our kidneys are responsible for controlling our body's pH levels, and focusing on an alkaline diet may help them do their job more efficiently.

Alkaline foods include legumes, vegetables, fruits, nuts, and natural fats. An alkaline-based diet focuses more on these foods and less on processed foods, dairy, grains, and alcohol, all of which are acidic.

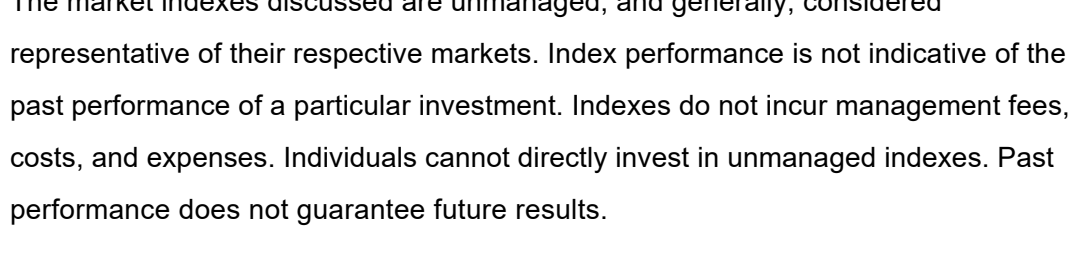

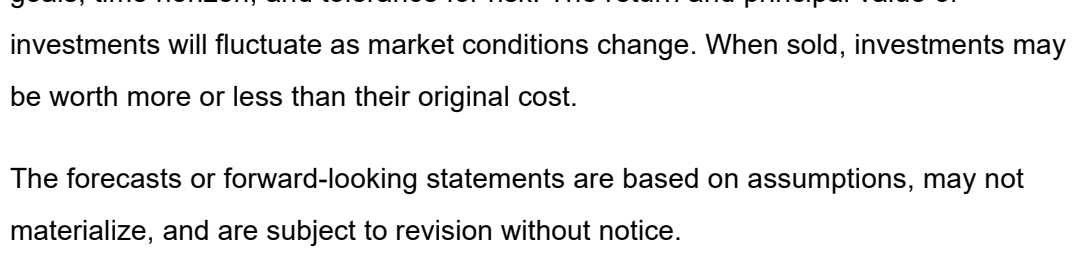

While there's still some debate over whether or not the alkaline diet is all it's cracked up to be, people may enjoy more health benefits because the diet is rooted in eating whole, unprocessed foods.

The market indexes discussed are unmanaged, and generally, considered representative of their respective markets. Index performance is not indicative of the past performance of a particular investment. Indexes do not incur management fees, costs, and expenses. Individuals cannot directly invest in unmanaged indexes. Past performance does not guarantee future results.

The Dow Jones Industrial Average is an unmanaged index that is generally considered representative of large-capitalization companies on the U.S. stock market. Nasdaq Composite is an index of the common stocks and similar securities listed on the NASDAQ stock market and is considered a broad indicator of the performance of technology and growth companies. The MSCI EAFE Index was created by Morgan Stanley Capital International (MSCI) and serves as a benchmark of the performance of major international equity markets, as represented by 21 major MSCI indexes from Europe, Australia, and Southeast Asia. The S&P 500 Composite Index is an unmanaged group of securities that are considered to be representative of the stock market in general.

U.S. Treasury Notes are guaranteed by the federal government as to the timely payment of principal and interest. However, if you sell a Treasury Note prior to maturity, it may be worth more or less than the original price paid. Fixed income investments are subject to various risks including changes in interest rates, credit quality, inflation risk, market valuations, prepayments, corporate events, tax ramifications and other factors.

International investments carry additional risks, which include differences in financial reporting standards, currency exchange rates, political risks unique to a specific country, foreign taxes and regulations, and the potential for illiquid markets. These factors may result in greater share price volatility.
